

Quality Policy

It is the policy of Kirby Engine Systems to conduct business in a manner that:

Continuously pursues innovation in the delivery of quality products and services meeting or exceeding the requirements of our customers and applicable regulatory bodies.

Maintains an efficient and effective quality management system that continuously provides the resources to consistently and uniformly ensure achievement of quality objectives that encourages ongoing communication and enhances productivity.

Continuously improves the effectiveness of the quality management system through the review of our quality policy, quality objectives and customer feedback, responding to the results of internal and external audits, customer and **employee** feedback, and implementation of corrective and preventive actions.
